**Petitioner:** undefined undefin  
**Address:** undefined undefir , undefined  
**PIN:** undefined  
**Complaint No.:** undefined-unc  
**Township:** undefine

### **BRIEF IN SUPPORT OF TAXPAYER'S 2017 ASSESSED VALUATION COMPLAINT**

Petitioner, represented by the attorneys of MUCH SHELIST, PC., hereby files this brief as an addendum to the RESIDENTIAL ASSESSED VALUATION APPEAL form for the above captioned property. The subject property is a un year old, Class undefined property with a total undefined square feet of improvement. The Assessor is proposing a total assessment of undefined , with a value of undefined for the building improvement and undefine for the land. Petitioner does not contest the land assessment. Rather, the Petitioner feels that the building assessment, which equates to \$ undefined per square foot, is unfair given the assessments of comparable properties in the area.

### **LACK OF UNIFORMITY**

Article IX of the *Constitution of the State of Illinois* provides, in part, that "assessments shall be *uniform* within each class." ILL. CONST. art. IX, § 4 (a) (b) (emphasis added). The Illinois Constitution's Uniformity Clause, require uniformity in the level of taxation and also in the basis for achieving the levels regardless of a property's value. *Walsh v. Property Tax Appeal Board*, 181 Ill.2d 228, 692 N.E.2d 260, 1998.

As the evidence attached hereto indicates, the subject property's assessed valuation is not uniform with similar properties and is excessive and incorrect. The comparables provided are similar to the subject in neighborhood, class, type of construction, style, size, age and other amenities; yet, each comparable's improvement assessed valuation (per square foot) is less than the subject. The subject's improvement assessed valuation must be reduced to achieve uniformity pursuant to Article IX of the *Constitution*.

Petitioner respectfully requests that the subject's improvement assessed per square foot valuation be reduced to \$ NaN , pursuant to the evidence submitted on the following page, thus reducing the Building Assessed Value to NaN and the Total Assessed Value to NaN .

Respectfully submitted,

"Molly" Mary A. Phelan
